Aztecsoft Joins Symbian Platinum Program

Aztecsoft to provide content delivery solutions and applications for Symbian smartphones

Bangalore, India, January 29, 2007 - Aztecsoft Limited has announced that it has joined Symbian's Platinum Program to support the growing market for Symbian smartphones. As a Platinum Partner, Aztecsoft is extending applications and platform solutions for mobile and convergence markets to the Symbian ecosystem. Symbian develops and licenses Symbian OS, the operating system that powers today's most popular smartphones. Symbian OS is licensed by the world's leading mobile phone manufacturers and to date; over 100 million Symbian smartphones have shipped worldwide to over 250 major network operators.

The smartphone market is entering a new era of lower cost, higher volume devices. Andy Brown, mobile devices specialist at IDC, predicts that cumulative sales of smartphones will reach over 1 billion units by 2011. He comments, "The smartphone segment of the handset market is seeing strong annual growth and is expected to rise from 57 million units in 2005 to around 250 million units by the end of 2010. The advent of single chip designs will inevitably attract a growing number of licensees and drive greater penetration into the mid-market segment."

"This partnership reflects our dedication to the mobile and convergence markets and our commitment to further enhance our mobile strategy," said **Gyana Bardhan Pattnaik, VP Mobile & Wireless Practice, Aztecsoft Ltd.** "By becoming a Symbian Platinum Partner, we expand our suite of offerings in the mobile domain to include messaging, entertainment, and content platform solutions enabled by mobile handset applications besides strengthening our relationships with users, application developers, smartphone manufacturers and carriers."

"The addition of Aztecsoft to the Symbian Platinum Program underscores our joint commitment to bring innovative applications and platforms to the ever expanding and increasingly sophisticated Symbian OS™ ecosystem," said **Mike Whittingham, VP Ecosystem Development, Symbian Ltd.** "Having Aztecsoft as a Platinum Partner will ensure some of the best mobile software engineering support will now be available for those companies wishing to develop mobile solutions for the world's leading smartphone OS."

Notes to Editors

About the Symbian Platinum Program

The Symbian Platinum Program includes companies that have a technology or strategic position that is key to the success of mobile computing technology surrounding Symbian OS™. Technology leaders such as Accenture, Avaya, Satyam Computers, Tata Consultancy Services, Wipro and Yahoo among others are partners in this program. As part of the program, Platinum Partners benefit from a range of commercial services, including technical support and joint marketing opportunities as well as privileged access to Symbian OS™ source code and a dedicated Partner Support team.
