

Aztecsoft Gains Membership of the Prestigious Mainframe Migration Alliance of Microsoft

Bangalore, Sept. 20 2007: Software Engineering specialist Aztecsoft Limited today announced its membership to the prestigious Mainframe Migration Alliance (MMA) of Microsoft. The Migration Alliance (MMA) is a group of companies that are working together to help customers migrate workloads off of the mainframe and onto the Microsoft platform. With this membership, Aztecsoft will be able to leverage its expertise and the technical depth that it possesses by providing strategic, tactical and cost effective solutions to its customers.

“Aztecsoft is committed to delivering excellence to its customers in the most cost effective manner. We are delighted to be a part of this initiative with Microsoft which enables us to provide enhanced product development and better interoperability by enabling customers to use technology to drive their business forward.” said Samir Bodas, President, Aztecsoft Limited. “Aztecsoft’s domain expertise to undertake such migrations puts us in the ideal position to help customers get the most out of their IT investments.” he adds

“Aztecsoft’s passion for Technology and excellence reflects perfectly the theme of the MMA - The alliance provides a great opportunity for two like-minded organizations to provide a wealth of knowledge for IT departments facing modernization of their mainframe systems. We are really excited about Aztecsoft Limited joining the MMA.” said Spyros Sakellariadis, director at Microsoft Corporation and sponsor of the MMA.

Microsoft is the key driving force behind the MMA. Members of the MMA find the Alliance provides value through visibility in the market and networking with peers. The marketplace also benefits from better solutions due to the advocacy of MMA and its members. The Alliance represents a group of companies that have their interests aligned in making Mainframe Migrations easier and more efficient for customers.

About the Mainframe Migration Alliance

Formed in spring 2003, the Mainframe Migration Alliance is comprised of software vendors and service providers focused on enabling mainframe customers to meet the challenges posed by legacy application environments, including the pressures to reduce IT costs and increase the flexibility in IT systems.

The Mainframe Migration Alliance web-community is designed to support these objectives:

- To provide a community where members can collaborate in order to make mainframe migrations easier and more effective
- To provide co-marketing, sales and support to partners and customers as they migrate workloads off the mainframe and onto the Microsoft platform
- To raise awareness of the viability and advantages of the Windows platform as an alternative to the mainframe
- To raise awareness of the viability of migrating workloads off the mainframe

- To provide a central point for publishing migration-related information and having discussions around migration topics

About Aztecsoft Ltd.

Since 1995, Aztecsoft has built and tested over 1500 enterprise-class products. The software engineering specialist provides best-in-class development and testing services to software product companies, portals & software services providers and companies in Mobility & Wireless and financial domains - full life-cycle development, enhancement, platform re-engineering, sustenance engineering, professional services, mobile enablement, SaaS enablement, full life-cycle testing, test automation and performance testing.
